Description			
Yay Beem! :)			
Feature request:			
In the "I've received a message from somebody" notification, it'd be nice to see the contents of the last message that particular contact sent me. (Presumably it'd be the text of the message which caused the notification to appear, but if they had sent me multiple messages without me clicking the notification I'd expect just the last one they sent.)			
Thanks again,			
Dave
