<b>Affected version:</b>	hg		
<b>Description</b>			
<p>I see that in a lot of strings translations and in English version in /res/values/strings.xml question mark is prepended with white space. This is incorrect for some languages. Can developers verify that these spaces don't have any special meaning and can be fixed according to rules of corresponded languages?</p> <p>I'm sure that space is not needed in Russian and English, and according to <a href="https://secure.wikimedia.org/wikipedia/en/wiki/Question_mark#Stylistic_variants">https://secure.wikimedia.org/wikipedia/en/wiki/Question_mark#Stylistic_variants</a> in French white space before question mark are used often.</p>
