Description

Hello.
Please help me.
I am using openfire_3_7_1 for XMPP server.
But If BEMM Android Client try connect to the Server, raised exception "Accept Unknown Certificate?" - "TrustAnchor for CertPath not found".

Quickly help me.

- Status changed from New to Resolved

- Priority changed from Urgent to Normal

This is the normal behavior when you are connecting to a not so secured server. You just have to choose if you want to accept the connection or not.
