Description			
Hello,			
I would like to use beam to develop and maintain a android chat application for my university, like a intra-college chat app. I would like to get permission from to authors of beam to use their code and develop on it.... also i would like the developers of beam to guide me through the development of beam to suit my requirements...			
Thanking you, shubham143@gmail.com

No need to ask for permission for that. You are free to do it as long as you comply to the [GNU General Public License 3](#) . Basically, you can get **Beem's** code and modify it to suit your needs, as long as you publish the changes you make for everyone to benefit from as well.

also i would like the developers of beam to guide me through the development of beam to suit my requirements...

For development questions, we have a public mailing list, feel free to subscribe [here](#) and send mail to beem-dev@list.beem-project.com.

If you want more realtime feedback, you can join #beem on the freenode IRC network or on XMPP MUC room: [beem@conference.elvzion.net](xmpp:beem@conference.elvzion.net).
