BEEM - Android XMPP - Bug #518

Beem terminates when connection lost and network interface changes

07/25/2013 07:23 AM - Anonymous

Target version:				
Affected version:	0.1.8		**Locale:**	

Description

Steps to reproduce:

- Enable WiFi and connect to local wifi network
- Connect to XMPP via Beem
- Walk out of area of Wifi until interface switches from Wifi to 4G

Result:
- Beem no longer running

- Restart Beem while connected via 4G
- Walk back to Wifi-covered area

Result:
- Beem no longer running

Very frustrating when using Beem to seamlessly transition from home office to surrounding area (like walking down the street to buy a coke). Even when anticipated, messages are missed while restarting Beem.

Version: 0.1.8
Model: SGH-T999
Android: 4.1.2
Baseband: T999UVDMD5
Kernel: 3.0.31-1128078
Build: JZO54K.T999UVDMD5
